One young man sets his eyes on a beautiful young woman, loves her, and thinks that she will be his. great good. She will be a great good, if she is a Godly girl, but not the great good for which he was made, and therefore if he stops short made, and therefore it he stops short there, he will miss his mark, and God will perhaps have to take her away from him, to show him his mistake, and to lead him to seek his happiness in God.

Others think that eetting on in Others think that getting on in the world, getting fame, reputation, or wealth will be their great good; they toil, and labour, and take a great deal more pains for it than will do them good, or satisfy them if they attain it. Oh! how many of these disappointed men I have talk-ed to! Men whose life was almost cone as their silver locks and tottering limbs testified, and, as they

Others make their family their great good. They say, "I will make this boy this, and that girl the other"; but there is hardly a parent on earth can do with his children on earth can do with his children what he desires, and he finds that even his children are not his great good. I hear there are some of you that say "Amen!" to that, but you will have bitterer things yet. The universe will only be divided into two parts at last—those who will be for God, and those against Will be for God, and those against Him. If you do not lake Him for your great good now, you will be reckoned amongst those who are reckoned amongst those who are against Him then. Those beings that have affinities for each other gather together. SUBSTANTIAL PROGRESS

BEING A REVIEW OF THE FOUR YEARS COMMAND BY DDI GADIER AND MRS. McLEAN OF NORTH-WEST DIVISION

T was in November, 1911, that for the use of the Calgary II. Brigadier and Mrs. McLean took charge of The Army's Work in Brass Bands have been organized at the Prairie Provinces. Advances and improvement have been gengest and some months ago it was abdivided, and a separate Division subdivided, and a separate Division formed of the Corps situate in the Province of Alberta. This makes comparisons difficult. One of the most pleasing facts is that during the period under review approxi-mately eight thousand have knelt at Army Penitent Forms, of whom nearly two thousand have been Army

added to the rolls.

A striking example of progress made is that there are more Soldiers in the Division now than when mant, despite the transfer of the Alberta Corps. In thinking of the latter, it should be remembered that these include some of the larger Corns of the Dominion, viz.: Calgary I. and Edmonton I

From the standpoint of new open-

at Prince Albert, Winnipeg II., Fort William, Weyburn, North, Battle-ford, Estevan, and Port Arthur. In some cases the Bands are small, but

some cases the Bands are small, hit render valuable assistance to the Corps. Another musical brigade organized during the command of the Brigadier is the Winnipeg Cita-del Young People's Songster Brigade, numbering twenty-five. All are duly commissioned. The Young People's Band of the Citadel Corps has not only maintained its position, ahout one dozen Bandsmen, who see proving themselves quite capable

of holding their own amongst the "big hoys."

A Young People's Band was organized in connection with the Cal-gary I, Corps, and at the present

time appears to be doing well.

The Young People's Work, perhaps, gives the greatest cause for

West Ontario, the culterprising town of Fort Frances was opened, and a splendid work is still going on. A Corps has been opiend in Weston, a suburb of Winnipeg; a Circle Corps is being operated, with head-quarters at McGregor, Manitoba, and military work is being carried on among the troops at Sewell Camp. Through the efforts of Brigadier McLean, The Army's representive at the Camp, Captan Westley Marsland, has been accepted as a Camp Chaplain,

Another line in which striking progress is recorded, is with respect to new bridlings. Splendid briek Citadels have been erected at Moose Citadels have been erected at Moose Jaw, Saskatoon, Regina, Scandina-vian Corps, Medicine Hat, Strath-cona; while comfortable Quarters have been erected at Stratheona and St. James Corps, In addition to this a lot and Hall-

rejoicing. The number present at the Company Meetings has made a splendid increase, and nearly all the Corns in the Division have a commissioned Young People's Sergeant Major and other Young People's Locals. "The number of "Young Soldiers" sold has been increased by a considerable figure.

Every special effort target has been reached, and in connection with the recent Self-Denial Effort, the Division was successful in securing the largest amount in its history This is particularly eheering when been passing through a trying time, ure last year and the war.

The Brigadier is grateful for the whole-hearted eo-operation he received from the North-West forces. During his eomanad, it has been the privilege of Mrs. Peacock and myself-to serve as Chancellors for nearly three years. This has been a lappy, profatable experience. Governmental Appreciation

The name of Lieut-Colonel W. The name of Lieut.-Colonel W. Measures has travelled far and wide in Ceylon. He is very much honoured and loved, not only by the oured and file, but by the high officials of the Government. This is seen by the action of the Governor, seen by the action of the Governor, when he ordered the hospital authorities to treat the Colonel free of charge. The hospital bill would otherwise bave run up to several hundred rupees. Sir Allen Perry, Kt., in a personal letter, said: "That the Colonel has not only been a religious leader, but a wise administrator and a commander, and that has made many valuable friends for

The Army.

In spite of the war conditions we re glad to report that the Harvest Festival Campaign has resulted in a record success. The total amount raised is eighteen hundred and two runers against sixteen hundred and hirty-six rupees in the year before.

We have hailed with delight the appointment of Colonel Mary Tait as our new Leader. Some one comas our new Leader. Some one com-ing direct from England seems to be a popular idea with our people in Ceylon, A real affectionate welcome awaits Colonel Tait in Ceylon,

Dressed in national costumes, Young People marched round the arena, and a children's prayer for their native land, composed by the famous poet Topelius, feelingly spoken by three boys, led up to the National Anthem, sung by the cutire audience. The national flag and mafonal songs were much to the front. These ideas are not merely a glorification of the country, but mainly express a desire to be helped by God to be good and worthy citizens, and they not only have a natural place in great demonstrations, but help to make an effectual spiritual appeal.

Pathetic indeed was the company song, in signs by deaf mutes, under the leadership of Adjutant Carlson. Some Divisions gave miniature musical festivals, and the Lapland-

WAR CRY

Printed for The Salvation Army in Canada, New-foundland, Bermuda, and Alaska, by The Salva-tion Army Printing House, 18 Albert St., Toronto

PRAYER WANTED

Salvationists, rank and file, will be able to realize the importance of the great interchange of Staff that has been announced in the later issues oi "The War Cry," and concluded in the interview with the Commic sioner in this. The changes are far reaching and affect the vitals of the Organization in Canada, but they have been made in the best interests of The Army, and are the outcome of nations, prayerful thought ripe experience, and sound index ment. But while decision has been made in the case of issuing farewell orders to the Officers concerned, the final word has not been said in connestion with the appointments. We therefore ask all who are interested in the Kingdom of God to bear The Army up on the arms of faith and prayer, that God may direct the Leaders of The Army in these changes so that the year' best shall be done for the success of The Army and the Salvation of souls

We would also ask our readers to remember the Commissioner in prayer on his trip to Newfoundland The dear comrades on that island are; to a certain extent, isolated, and their opportunities of receiving visitors from the Dominion very limited. The visit, therefore of the Commissioner is an event that counts for a great deal. The Commissioner's spiritual power and zeal, together with his fervid eloquence, will make him the channel for a great deal of inspiration; so pray that God may pour out His Spirit upon him, and that the Officers and Soldiers and friends of the Newfoundland command may receive a mighty impetus in their warfare against the world, the flesh, and the devil .

Last month one hundred and thirteen Cadets were welcomed to the Training College at Melbourne (Australia). Fifty other Candidates who intended entering were unable to do so owing to the war and the recent severe drought.

"I have this afternoon" said the Commissioner, leaning back in his chair his favourite attitude when talking, as it allows free play for an expressive use of his hands, dictated farewell orders, with instructions to leave their appointments by the 10th of October to Lieut. Colonel Chandler of the Toronto Division; Lieut. Colonel Hargrave, of the Young People's and Candidates' Departments; Brigadier Rawling, of the Montreal Division; Brigadier Adhy, of the Hamilton Division: Brigadier Taylor, of St. John Division; and Major Harr, of the Hali-Arnold, and Cocmbs, and Staff-Cantain Burrows"

"And the appointments, sir, could you tell our readers where the Of-

ficers mentioned are going?" "Well, now," said the Commissioner, with a humorous twinkle in his eyes. "It's the furlough season. and to give those dear comrades who are fond of fixing up Officers something to do as they sit on the lakeshore watching the setting snn, or as they drowse in the shadows of ambrosial pine woods, I will forbear to tell you where all are going. "Have you any special object in going to Newfoundland, Commissinuer?

"No; it will be mainly a soulsaving trip. I shall, of course, do a thorough inspection and acquaint myself fully of our educational system, with a view to its development, and I may say that I am taking farewell orders to Brigadier Morehen, fax Division. Also Majors Moore, 7 who, during his term of command, has done excellently. But in the main, my object will be to pay soulsaving visits to the forces in Newfoundland, whom I am most anxious to meet.

"I have heard a lot about the island's rugged grandeur in some parts, and of its being the land of birds, butterflies and flowers in others, and shall view these things with interest: but it is the nearly themselves I want to see I have heard so much of their simple piety, their red-hot Salvationism, that 1 think they are a people after my own heart And am looking forward to some soul-stirring seasons among them, both at St. John's and in the Outports.

There was no concealment about Germany's great concentration at Cracow for the drive at the Russians along the Dunajec, in May, It-was.-the only plan open, and every-one—even spectators on this side of the water—could predict it with practical certainty. But Germany was able to concentrate more troops, and more efficient troops, in quicker time than Slav host was driven back, er time than Russia-and the

intense during these past months, for the duffert seldier can see that there is no longer any "open question" about the selue of the seroplane. Machines have been develop-ed for all sorts of fighting and scout-ing work—not by a set plan, but by the necessities of the situation. In a surprising short time there has of war, almost comparable to the of war, almost comparable to the army or the navy: It has its own officers, its own military divisions and units, its own tactics, its own strategy, its own bases

strategy, its own bases, And in this growth it has followed with singular fidelity the general plan of a modern navy. The fighting forces of the air have their scout truisers, their fast battle eruisers, and their dreadnoughts, like a well-balanced feet of the sea; and it is predicted that we shall soon hear of flying torprede beats, which may prove a worse menaee to shipping

prove a worse menace to shipping than the submarine.

In the first place, there are the fleet scont cruisers of the air. These are small machines, usually of the hiplane-tractor type. They earry only the pilot and an observer, and their plane area is so small that they can remain in the air only when travel-ling at high speed. Experts on this side state that the minimum gait of side state that the minimum gait of the new models is in the neighbour-hood of seventy miles an hour, and

hood of seventy miles art hour, and the maximum perhaps double that. These fliers are used solely for observation work. Therefore they are lightly armed, carrying a small machine gun at the most. Being too swift to have much fear of artillery, swift to have much fear of artillery, they need to protect themselves only from attack by other aircraft. They take to their heels and pump rife bullets at pursuing aviators, bringing back information of the doings of the enemy's flying forces, and earrying to general headquarters reports on the movements of troops

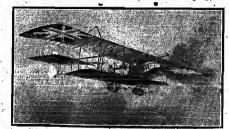

and trains The second line, corresponding to The second line, corresponding to the battle cruisers, are large, heavy biplanes equipped for rather rough work in the air. The lifting power of the latest machines is only a mat-ter of guesswork, but 'it is known that their stability in full flight has that their stability in full flight has been perfected to such a point that they can absorb the recoil of a six-pound quick-fring gun without danger of upsetting.

The maximum speed of the cruis-

I be maximum speed of the cruis-ing biplanes is approximately the minimum speed of the lighter scouts but even so, they are dangerous to the swift spies because of their long-range hitting power. They shoot explosive shells, and it is not necessary to strike one of the light ma-chines to bring it down. A shell that bursts anywhere within a goodly number of feet will create an air disturbance sufficient to upset the delleate halance of the enemy's swift flier, and to send it toppling, end over end, to the earth below.

But these cruisers are rapidly be-coming the terror of dirighles, the dreadnoughts of the air. Even the Eeppelins, with their rigid metal bodies divided into twenty-live or thirty compartments, have to fear these battle cruisers when they come in numbers. About the middle of in numbers. About the middle of May it was reported that a swarm of twenty-seven Allied aeroplanes of the battle cruiser type attacked a Zeppeffin in Flanders, and succeeded in blowing so many hofes in its aluminum envelope that the "big sausage" finally came down to earth

This was a newspaper story-not this was a newspaper story—not, alas, a guarantee of accuracy—but early in June an official Admiralty report described the total destrucearly in June an otheral Admiratly report described the total distruction of a Zeppelin, near Ghent, ly a young English aviator, who had each tered the naval air service only a month before. The flying man, who must have been a skilful operator mounted on a swift machine, sac ecceded in rising above the monstead a tremendous explosion of its gas tanks. With its crew of its gas tanks. With its crew of twenty-eight men, the big dirigible crashed to the earth a mile below, where, by a tragic piece of ill-luck, its shattered frame struck a Belgian convent and killed several of the inmates. The victorions aeroplane was upset by the force of the explosion, but the operator righted, it, volplaned to the ground within the enemy's lines, restarted his engline, enemy's lines, restarted his engine, and flew off to safety.

and flew off to safety.

It was a curious coincidence that on the same day Count Zeppelin was reported as acknowledging a was reported as acknowledging an message of congrarulation from the German Aviation League, and inci-dentally remarking that his inven-tion "had brilliantly proved its worth." The modest parent of the Zeppelin seems to have a much higher opinion of his progeny than

most of the impartial observers.

But it is when aeropfane and aeroplane meet far above the hattlefield that the old romance of war is re-horn in its newest and most thrill-ing guise. The soldiers of the air have developed their own tueties of have developed their own facties of battle, which are strangely reminis-cent of the stories that came down to us from the ancient and royal sport of hawking. Each aviator tries to ge! above the other, and to attack when his opponent is in a defenceless position.

One of the egatest hits of aprial One of the neatest bits of aerial strategy is to maneon res of that the fire of your machine gun enflades the enemy's propellers. A stream of bullets poured along that line is practically certain to wreck one or hoth of the great wooden fans and bring him to the ground

hring him to the ground. Not only on land, but at sea as well, the aeroplane, the "flying hoat," is attaining an increasingly military importance. When this great war is over, we are likely to learn that the vigilant aeroplanes of France and England explain the mystery of the constant transport of men and mindican across the Channel with munitions across the Channel with so little danger from the lurking German submarines. For the acro-plane is the dealliest enemy of the "undersea hoat." It is the kingfisher of the new war.

This is easy to undersaud. A man flying above the ocean can see into the water to an extraordinary depth, He can make out a submarine or a the can make out a submarine or a submarine from the almost as readily as if it were on the surface; and the submarine cannot see him, for its periscope is not built that way. He can follow it for miles, and it it comes to the surface he can demolish it with a homb or a six-pound gun long before he is discovered. Or with his wireless telegraph he can unity the destroyer and scout cruisers and guide them to their prey. same of The value of the flying craft as Father!

scouts in naval campaigns is immeasurable. More than twice as fast as anything that floats, and with a range of vision limited only by the strength of telescopes, one stout aeroplane can gather more information, and transmit it more swiftly, than a dozen scout cruisers

than a dozen scoul cruisers.
Any city is a scaport for the airship, and land and water, field and monutain, all form a smooth roadway for it. Tennyson's prophecy of the rain of 'ghastly deen fron the nations' airy navies grapulting in the central blue' has already been fulfilled. And history may record that these 'airy awates' did much to bring about the infilment of the closing scene of the poet's vision:—

See the brazen hosts of hell. See the brazen hosts of hell, Art and power employing; More than human tongue can tell, Blood-bought souls destroying. Hark! from ruin's ghastly road, Victims grown beneath their load. Forward, O ye sons of God, And dare or die for Jesus.

COME WITH ME!

Come, oh, come, and go with me, Where leve is beaming, Come, oh, come with me, Where light is streaming, Light and love Divine In Christ revealing
God Himself to you and me,

Chorus.-Hallelniah! Hallelniah!

None can be too vile For love so beaming, None can be too dark For lights so streaming; Christ can make you whole Through faith believing, Full Salvation give to you.

COME IN, COME IN

Come in, my Lord, come in, And make my heart Thy home; Come in, and cleanse my soul from

Siu,
And dwell with me alone. Thyself to me be given,
In fulness of Thy love;
Thyself alone will make my heaven, Though all Thy gifts remove.

Chorns: Come in, my Lord, come in,

My Lord, Thou dost come in—
I feel it in my soul;
I hear fliy words, my Saviour King,
"Be every whit made whole."
Glory to God on high!
Let heaven and eart; agree
My risen Christ to magnify—
For lo! He lives with me.
